

## Instructions of article writing

General guidelines to be followed:

We are inviting two types of articles for inauguration issue of **Science Dialectica** Magazine. The articles must be (i) popular science article and (ii) topical review on current trends of science and technology.

### (i) Popular Science Article

The article should not be a conventional journal type and we are expecting it to be like a TEACHER'S LECTURE. This is solely for students for their higher education and those who deals with research concepts, for example industry person.

There should be no introduction, experimental methods and conclusion. However, a brief abstract and proper referencing must be included. Content of writing should be in paragraph mode. All phenomena will be expressed in popular scientific manner by which anyone can understand the content and subject matter. Any technical term should be defined in lucid and simple manner. Article should be like a teacher's class note. There should not be any unpublished data of research work. There is no restriction of topic, but it should be scientific. It can be theorem, materials and methods, tools and techniques, analysis, instruments and measurements, and software etc.

### (ii) Topical review

This should be like a standard journal format. Guidelines are attached.
